

IMAP Most transactions in the Nordic countries in 2007 – 2009

International Network of M&A Partners, IMAP, implemented most M&A transactions in the Nordic countries in 2009. This was already the third year in a row when IMAP is the number one in the Nordic countries according to the number of completed transactions. Of those 26 transactions that IMAP implemented in the Nordic countries ProMan carried out nine. This is proved by the world's leading information company Thomson Reuters.

Last year the number of M&A transactions fell to the lowest of the whole decade in Finland. The most busy M&A year was 2007 when Nordic IMAP advisors implemented 40 transactions. Of those peak years the number of transactions that IMAP implemented decreased to 33 in 2008 and furthermore to 26 in 2009 which was the poorest M&A year in the whole decade. However IMAP has been able to implement most transactions in the Nordic countries in the both busiest and lowest M&A year in the 21st century.
